

Access immunisation information

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their Individual Healthcare Identifier (IHI) has been validated in your system.

While some immunisation information may be available in the patient's shared health summary or an event summary, this may not include vaccinations provided at other sites or clinics. For a more complete list of immunisations, access the Australian Immunisation Register via the Medicare Overview.

1. To access to the patient's My Health Record, select **Open My Health Record > View Health Record Overview** from the ribbon menu

2. Scroll down and click on the **Medicare Overview** tile

The screenshot shows the patient's health summary dashboard. The 'Medicare Overview' tile is highlighted with a red box. The dashboard includes sections for 'ALLERGIES & ADVERSE REACTIONS', 'IMMUNISATIONS', and various service tiles.
