

Accessing Prescription and Dispense View

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their individual healthcare identifier (IHI) has been validated in your system

STEP 1:

To gain access to the patient's Prescription and Dispense view, either:

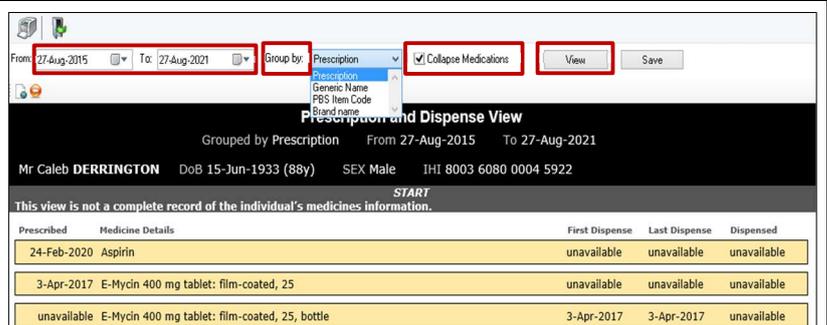

- Select **My Health Record** tab, then **View Prescription and Dispense** from the menu; or
- Click on the **Prescription and Dispense view** button within the Current Rx screen.

STEP 2:

The **Prescription and Dispense View** will appear in a collapsed medications overview (subject to any date filters that have been set). By default, the information is grouped by prescription and sorted by date.

You can also **group by** the Generic name, PBS Item Code or Brand name of the medication. Click **View** to refresh your search.

STEP 3:

Untick the **Collapse Medications** checkbox and click view box to **View** further details about the medication.

STEP 4:

To view the medication details, click to open and view full details of the **Prescription or Dispense Record**.

Prescription and dispense records contain information about medicines prescribed and dispensed by a healthcare provider. This view can display the name of a medicine (both the brand name as well as the active ingredients), the strength of the medicine, the directions and the form of the medicine prescribed. It can also display the date a medicine has been prescribed, the date it has been dispensed, and the number of repeats available on the prescription.
