# Accessing the Medicines Information View

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their individual healthcare identifier (IHI) has been validated in your system

STEP 1: To access the patient's My Health Record, click on the **My Health Record** button and enter authentication initials and password.	
STEP 2: A **My Health Record Access** pop-up message will appear. Select **Gain Access (to all "General Access" eHealth record or documents)** and click **OK**.	
STEP 3: Select the **Medicines View** tab within the My Health Record view window. Double-click to open and view.	
STEP 4: The **Medicines View** will display available medicines and allergy information held in a patient's My Health Record with the **Allergies and Adverse Reactions tab** displayed by default.	

STEP 5:

To view a patient's medicines information, click on the **Medicines Preview tab**.

By default, the medicines information is sorted by date. To sort the medicines by active ingredient, click on **Medicine – Active Ingredient(s)**.

Note that you can click on any hyperlinks within the list of medicines to view the original source document (e.g. Event Summary or patient entered notes).

The information in the **Medicines Information View** is gathered from:

- The patient's most recent (and up to two years') **Prescription and Dispense records** and other **PBS claims information**
- The patient's most recent **Shared Health Summary** and **Discharge Summary**
- Recent **Event Summaries, Specialist Letters** and **e-Referral notes** uploaded to the patient's record since their latest shared health summary
- The patient's **Personal Health Summary,** which may include any allergies or adverse reactions and other key information.

If available, a link to the **Pharmacist Shared Medicines List** will be provided in the Medicines Information View.
