

Accessing Immunisation Information

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their individual healthcare identifier (IHI) has been validated in your system

STEP 1:

To access the patient's My Health Record, click on the **My Health Record** icon and enter authentication initials and password.

STEP 2:

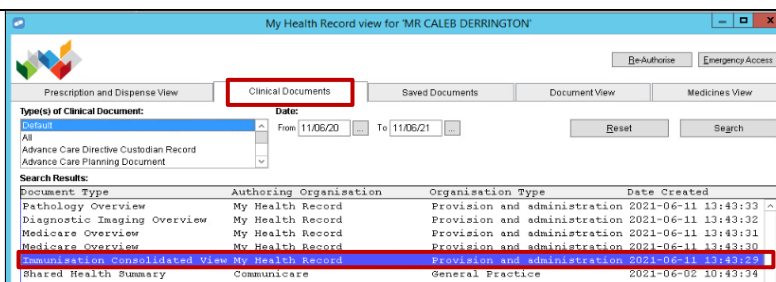

A **My Health Record Access** pop-up will appear. Select **Gain Access (to all "General Access" or documents)** and click **OK**.

STEP 3:

The My Health Record view window will appear. Select the **Clinical Documents** tab and click on the **Immunisation Consolidated View**.

Double click to open and view the document.

STEP 4:

The **Immunisation Consolidated View** will display with the **Australian Immunisation Register (AIR)** tab displayed by default.

Details of a patient's immunisation status including details of next immunisation(s) due will also be displayed if recorded in AIR.

The **COVID-19 Immunisation Status** field displays as:

- 'This individual has **not** received all required COVID-19 vaccines' if someone has had only one vaccine; or
- 'This individual has received all required COVID-19 vaccines.'

If no COVID-19 vaccines have been received, the status isn't displayed.

If there is additional information recorded in AIR, this is displayed in a **Notices** section. This may include details about immunisation exemptions or participation in vaccine trials.

National Immunisation Program (NIP) status:	
COVID-19 Immunisation Status:	up to date not up to date
Next immunisation/s due	
Comirnaty	02 Apr 2021
Notice/s	

STEP 5:

Click on the **Immunisations** tab to access available immunisation information recorded in the Australian Immunisation Register and held in any shared health summaries or event summaries in a patient's My Health Record.

You can click on any hyperlinks within the immunisations list to view the original source document.

From this view you can also access the most recent **shared health summary** and **event summary** that contain immunisation information.
