

Accessing the Medicines Information View

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their Individual Healthcare Identifier (IHI) has been validated in your system.

- To access the patient's My Health Record select the **My Health Record** tab.

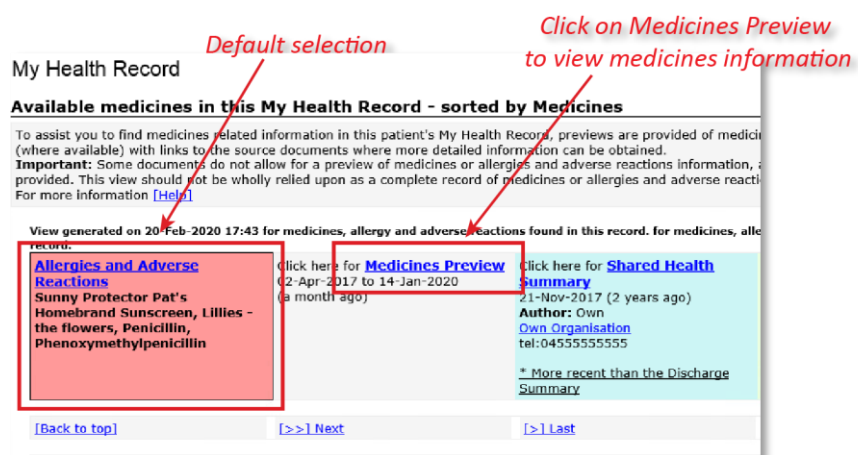

- Click **View Document List** on the left side and then double-click on the **Medicines View** in the document list (which will always appear near the top of the list).

- The **Medicines View** will display available medicines and allergy information held in a patient's My Health Record with the **Allergies and Adverse Reactions** tab displayed by default.

To view a patient's medicines information, click on the **Medicines Preview**.

4. The medicines information is sorted by date by default. To sort the medicines by active ingredient click on **Medicine – Active Ingredient(s)**.

Note that any hyperlinks within the list of medicines can be clicked on to link through to the original source document (e.g. Discharge Summary or Shared Health Summary).

The information in the **Medicines Information View** is gathered from:

- The patient's most recent (and up to two years') **Prescription and Dispense records** and other **PBS claims information**
- The patient's most recent **Shared Health Summary** and **Discharge Summary**
- Recent **Event Summaries**, **Specialist Letters** and **e-Referral notes** uploaded to the patient's record since their latest shared health summary, and
- The patient's **Personal Health Summary** that may include any allergies or adverse reactions and other key information.

If available, a link to the **Pharmacist Shared Medicines List** will also be provided in the Medicines Information View.
