# Request a diagnostic imaging report not be sent to My Health Record

If your patient does not want a diagnostic imaging report uploaded to My Health Record, the imaging service should be notified by completing the steps below. This will not affect your current business process of requesting and receiving reports, it simply stops the information being sent to your patient's My Health Record on this occasion. We encourage you to discuss this with your patient as having access to imaging reports in their My Health Record may improve their future healthcare.

STEP 1: Select **Order X Ray** from the top menu (top-left corner)	
STEP 2: In the Radiology Request screen, tick the **Do not send to My Health Record** box in the bottom right of the window.
