

Accessing the Medicare Overview

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their individual healthcare identifier (IHI) has been validated in your system

STEP 1:

To access the patient's My Health Record, select **My Health Record** from the top menu.

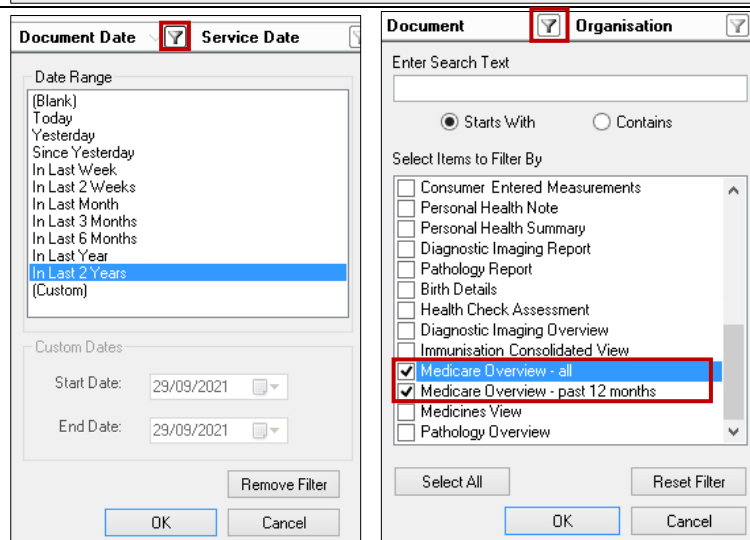

STEP 2:

The Document List will appear, displaying documents in the patient's My Health Record (subject to any search filters which are set).

You can filter the document list by selecting the funnel icon. Pop-up windows will appear allowing you to reset the relevant search parameters. For example, you can filter by **Document Date** or by **Document type**. Adjust document types to display by ticking/unticking the preferred checkboxes. Once completed, select **OK**. The document list will update to reflect the changes to the search parameters.

Select either **Medicare Overview - all** or **Medicare Overview - past 12 months**.

Note: An individual can choose which Medicare information is added to their record. They can control information such as claims for medical services, doctor visits, tests, medicines, organ donation decisions, and immunisations. The individual can choose to add some or all of this information to their My Health Record.
