

Removing and Superseding Uploaded Documents

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their individual healthcare identifier (IHI) has been validated in your system

Documents can be removed from an individual's **My Health Record** by the original author of the document. If you are the author of the document you can follow these steps to remove a **Shared Health Summary** or an **Event Summary** from your patient's My Health Record.

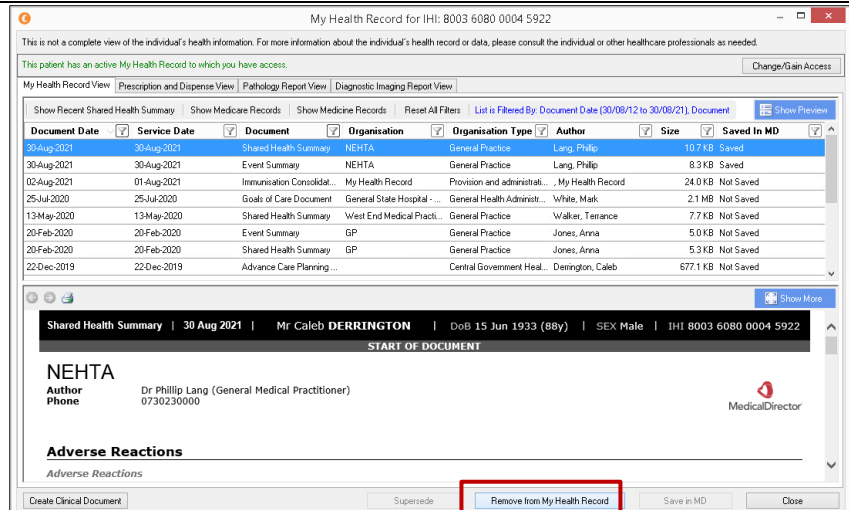

STEP 1:

To access the patient's My Health Record, select **My Health Record** from the top menu.

STEP 2:

The patient's Document List will appear. Select the document to be removed from the list, noting the document type and date. Once selected, click **Remove from My Health Record**.

STEP 3:

Indicate the reason for removal of the document from the menu: Withdrawn or Incorrect Identity. Click **Continue**.

STEP 4:

A confirmation pop-up will appear on screen once the document has been successfully removed from the patient's My Health Record.

Removing and Superseding Uploaded Documents continued

An **Event Summary** can also be **superseded** by a new version that replaces the original. You can only supersede documents that you have authored.

A **Shared Health Summary** cannot be superseded, it must be removed and a new document uploaded, if appropriate.

To supersede an Event Summary follow these steps:

STEP 1:

Select the **Event Summary** document to be superseded from the Document List, then click **Supersede** from the menu options below.

My Health Record for IHI: 8003 6080 0004 5922

This patient has an active My Health Record to which you have access.
