

Accessing the Medicines Information View

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their individual healthcare identifier (IHI) has been validated in your system.

STEP 1:

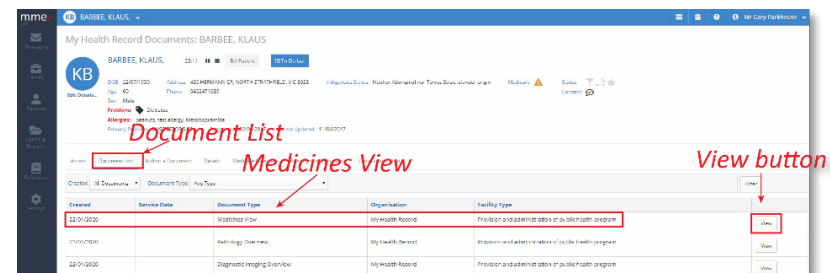

To access the patient's My Health Record:

- Select the **Patient Widget** (top-left corner)
- Then select **My Health Record**.

STEP 2:

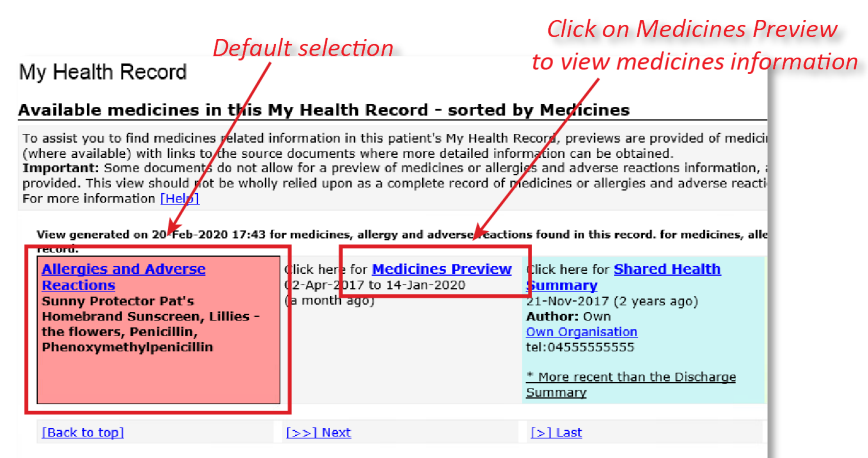

In the **Document List**, **Medicines View** will always appear at the top of the list. Click on the **View** button for that item.

STEP 3:

The **Medicines View** will display available medicines and allergy information held in a patient's My Health Record, with the **Allergies and Adverse Reactions** tab displayed by default.

To view a patient's medicines information, click on the **Medicines Preview**.

STEP 4:

The medicines information is sorted by date by default. To sort the medicines by active ingredient, click on **Medicine - Active Ingredient(s)**.

Note that any hyperlinks within the list of medicines can be clicked on to view the original source document (e.g. **Discharge Summary** or **Shared Health Summary**).

The information in the **Medicines Information View** is gathered from:

- The patient's most recent (and up to 2 years') prescription and dispense records and other PBS claims information
- The patient's most recent shared health summary and discharge summary
- Recent event summaries, specialist letters and eReferral notes uploaded to the patient's record since their latest shared health summary,
- The patient's personal health summary that may include any allergies or adverse reactions and other key information.

If available, a link to the pharmacist shared medicines list will also be provided in the medicines information view.
