

New test categories

In addition to those tests already immediately available for consumers to view (HbA1c, INR, COVID-19 and other respiratory infection tests), the top 75 test types by volume from each new category listed below will also be available for immediate access once uploaded to My Health Record.

- ACTH
- Albumin*
- Albumin: creatinine ratio
- Ammonia
- Antinuclear Ab
- Beta HCG quantitation Blood culture
- Blood gas arterial
- Blood gas venous
- Blood group and antibody screen
- Calcium Ionised
- Calcium Magnesium Phosphate
- Calcium*
- Coagulation profile
- Cortisol
- C-reactive protein
- Creatine Kinase
- D-dimer
- Deamidated gliadin Ab
- Digoxin level
- eGFR
- Electrolytes Urea Creatinine
- Erythrocyte sedimentation rate
- FOBT
- Follicle stimulating hormone
- Free T4
- Full blood count
- Gentamicin level
- Glucose
- Growth Hormone
- HbA1c
- HDL cholesterol
- Hepatitis B surface Ab, Hepatitis B
- Hepatitis*
- HIV serology
- INR
- Insulin
- Iron studies
- LDH*
- LDL cholesterol
- Lipase
- Lipids fasting/non fasting
- Liver function tests
- Luteinising hormone
- Magnesium*
- MCS genital
- MCS urine
- Neisseria gonorrhoea nucleic acid
- Oestradiol
- Paracetamol level
- Parathyroid hormone
- Phosphate*
- Point of Care*
- Prothrombin time
- RBC*
- Respiratory*
- Rheumatoid factor
- Sex hormone binding globulin
- Testosterone
- Thyroid function tests
- Thyroid stimulating hormone
- Troponin T
- Urate
- Urea urine 24h
- Urea*
- Urine dipstick and microscopy
- Vitamin B12
- Vitamin D

***Note:** some Royal College of Pathologists of Australasia's Standardised Pathology Informatics in Australia (SPIA) categories are specific to one of several related test variants. We broadened the category to include these other related tests. An example is the SPIA "Calcium, Magnesium Phosphate" panel. We included any individual test for Calcium, Magnesium or Phosphate (including the combination of the three).
